🏠 Agartala, Tripura 799015

in LinkedIn — 🐙 GitHub — 📁 Portfolio — </> LeetCode

Professional Summary

Full-Stack Developer with expertise in Python, JavaScript, React, and FastAPI. Experienced in building scalable web applications, RESTful APIs, and AI/ML systems. Strong foundation in database management, frontend architecture, and real-time applications. Solved 50+ LeetCode problems, showcasing analytical and debugging strength.

Education

Techno College of Engineering, Agartala 2023 – 2027
B.Tech in Computer Science - CGPA: 8.89

Bhavan's Tripura Vidyamandir, Tripura 2013 – 2022
Class 12 (Higher Secondary) - 82.2%
Class 10 (Secondary) - 89.6%

Technical Skills

- **Languages:** Python, JavaScript (ES6+), C++, Java
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive UI
- **Backend:** FastAPI, REST APIs, WebSockets, Node.js, Express.js
- **AI/ML:** TensorFlow, Keras, OpenCV, scikit-learn, NLP
- **Tools:** Git/GitHub, VS Code, Postman, Android Studio

Soft Skills

- Teamwork
- Strong Communication
- Analytical
- Adaptability
- Leadership
- Time Management
- Patience

Certifications

- **Generative AI for Everyone** – DeepLearning.AI
- **Node.js- Beginner to Advance course with projects** – Udemy

Achievements

- **1st Place** – CODESTORM 1.0 Coding Competition
- **2nd Place** – Fun Chemistry 2.0 Competition
- **GDSC Core Member** – Organized HackVortex & Intel-lixAI Ideathons

Professional Experience

- **Android Development Trainee** 2024
NIELIT AGARTALA
 - Developed real-time weather forecasting Android app using APIs and geolocation.
 - Implemented modern Android development practices with Kotlin.
- **AI & Machine Learning Trainee** 2025
CTTC BHUBANESHWAR
 - Created Face Recognition Attendance System using Keras and OpenCV.
 - Applied computer vision algorithms for automated attendance tracking.

Projects

Resolvify (*React, FastAPI, WebSockets*) 🐙 GitHub

- Developed a multi-shop customer support platform for 50+ users enabling real-time issue resolution.
- Built WebSocket-based chat reducing message latency by 25%.
- Designed secure REST APIs with role-based access control for admins and agents.
- Improved support team efficiency and response time by 30% through a live dashboard.

BlockCert (*React, Solidity, Hardhat.js, IPFS*) 🐙 GitHub

- Architected a decentralized credential verification App to combat document fraud using Ethereum smart contracts.
- Implemented SHA-256 cryptographic hashing and Pinata IPFS for tamper-proof storage, ensuring 100% data immutability.
- Deployed contracts on Sepolia testnet, reducing verification time from days to seconds via instant blockchain lookups.
- Engineered a full-stack portal for issuers and students, eliminating central points of failure in record keeping.

Medicine Management System (*FastAPI, SQLAlchemy, MySQL*) 🐙 GitHub

- Engineered a backend for medicine inventory and order management.
- Automated stock updates reducing manual input errors by 40%.
- Developed scalable CRUD APIs using SQLAlchemy ORM ensuring maintainability.
- Improved database performance and reliability for seamless operations.

IntrusionIQ (*Python, Scikit-learn, XGBoost, FastAPI, Docker*) 🐙 GitHub

- Built a two-stage intrusion detection system on CICIDS2017 (2.8M flows) using a Voting Ensemble (RF+XGBoost+MLP) with Isolation Forest for zero-day detection, achieving 99.72% F1 and 0.10% false positive rate.
- Deployed as a containerized FastAPI backend + React dashboard, serving real-time predictions across 15 attack classes via Docker Compose.
